HAYNES GROUP

Haynes Group's capabilities

In June 2012, the Haynes Group was acquired by Sime Darby's Industrial division. Sime Darby is one of the world's largest earth moving equipment dealers, with dealerships across more than 100 branches in 10 countries throughout the Asia Pacific region. This scale provides the Haynes Group with the advantages of a stronger balance sheet to enable growth, increased market share and geographical expansion. This stability provided significant comfort and stability to Haynes' clients, who know that as a business partner, the Haynes Group can deliver the outcomes and has the financial capabilities to manage multiple contracts both large and small.

The Haynes Group is currently a major service provider to BMA, Rio Tinto, Xstrata, Anglo American Metallurgical Coal, Thiess, Leighton, Downer Group, NRW and Ergon Energy supplying labour hire, crane hire, workshop repair and overhaul facilities and

Haynes is one of the business growth achievers within Queensland priding ourselves on employment of local people, including 25 apprentices, and maintaining our excellent safety record. The Haynes Group adopt a Zero Harm policy and work with our clients and employees to ensure a safe and harmonious workplace at all times.

HAYNES GROUP

Haynes Electrical Division

Utilizing small, familiarized and experienced teams, we can tender/ estimate, supervise and execute minor to medium size lump sum or schedule of rates projects in the Mining, Ports, CSG/LNG and Manufacturing industries.

With "in house" support from our other divisions we can also add to our electrical capabilities, light fabrication, mechanical and diesel fitting services, and engineering certifications without the need for accessing third party suppliers.

Some examples of areas where we may be able to assist include:

- | LED lighting installs/changeovers including turtle friendly lights for maritime environments and optional battery back up systems,
- | Full mech/elect servicing, statutory checks, audits and overhauls/ refurbishment of remote lighting and pumping plants,
- | Minor and medium projects installations and refurbishments,
- | Electrical planning, QA, supervision and labour support for processing plants, dragline and shovel maintenance,
- | HV cable installs,
- | Down day maintenance support,
- | MCC upgrades and variable speed drive installations,
- | Labour hire.

PACKA JACKS Lifting Systems

From 150T to 2000T, the PACKA JACKS Lifting Systems offer a huge range of capabilities across a broad spectrum of applications.

The lift units are self – contained, with all lifting hydraulics, packing mechanisms and laser alignment devices packaged in a solid, compact casing with excellent intrinsic stability. Certified lifting lugs, control input points and secondary hydraulic input points complete the general description of the lifting units. The system is controlled from a fully enclosed, air conditioned control console located adjacent to the work site for optimum site visibility.

- | No suspended loads
- | No multiple Crane lifts
- | Workcover certified – A much SAFER lifting mechanism
- | Machine and production downtime reduced by up to 80%
- | Costs reduced by more than 50%
